

**PUBLIC SAFETY**  
**Consulting Services**

**Mission Critical Communications & Public Safety Consulting Services:** Monetti and Associates is a trusted advisor to public safety agencies, responsible for keeping complex environments safe. Through the public safety consulting process, we work closely with our clients helping to guide the development of our clients' vision into the future. Our public safety consulting services stretch from governance to operations to technology and engineering services. Our expert consulting associates can provide in-depth technical assessments at every organizational level. Whether it be designing your radio network, implementing best practices and technology for Cyber security, researching advancements in technology like infrared patches or helping you define technical requirements to develop a RFP, our team is well equipped to provide thought-leadership across a wide range of technologies.

Today many Public Safety Agencies struggle with developing the optimum staffing plan that optimizes their agencies performance while ensuring agency employees are well balanced and compensated for the work they perform. Monetti and Associates can help you analyze your operations to determine how to effectively, efficiently, and safely deploy your valuable personnel resources. We offer professional staffing, planning, policy and governance consulting services to optimize your agencies performance. Whether it be improving the average response time to a crime or creating a well-balanced labor budget for overtime time pay, we can help agencies optimize their teams.

Table 1 below highlights a wide variety of our Public Safety consulting and engineering services. For more information visit our website [www.monettiandassociates.com](http://www.monettiandassociates.com) or call us at 301-514-7992.
